

How to use your DentAssure plan

Internal reference for DentAssure members, visitors, and network clinic staff.

1. What DentAssure is

DentAssure Health Plans is a dental membership and outpatient dental cover. You buy a plan, then take treatment at a network clinic. Public pages: dentassureplans.co.in, Our Plans, About Plans, network clinics, all clinics, and blog.

2. How to use your plan at a clinic

Show the plan at reception. Reception checks waiting period, remaining limit, and whether pre-auth is needed. Cashless is only at in-network clinics. Emergency pain can start immediately; pre-auth is filed the next working day if required.

3. How plan compare works

If you name treatments (for example OP consultation and scaling), DentAssure ranks published plans by treatment cost plus plan amount. That is the same idea as compare-services on the website. Informal English is fine: rct scaling konsa plan lena.
